Projects

Weather App
Developed a responsive web application using React and integrated with a weather API to display current weather and 6-day forecast for any city worldwide. Implemented features include real-time weather updates, city search functionality, and dynamic forecast display.

Dictionary App
Developed a comprehensive dictionary web application using React and integrated with a dictionary API. Features include real-time word lookup, displaying parts of speech, multiple definitions, synonyms, and related images for any queried word.

Calculator App
Developed a user-friendly calculator web application using React. Implemented basic arithmetic operations with a clean and intuitive user interface.
